ABOUT US

Techwind MarineLifts is a Polish lift company that was established in March of 1987. Since early 1990 we started our cooperation with shipyard industry to provide wide range of elevator solutions for marine units. Since then we have installed more than 100 different lifts on board many types of vessels and platforms. Many different Ship owners trusted our company in the past and were more than satisfied with service we provided.

PASSENGER AND CARGO SOLUTIONS

Lifts delivered for Passenger ferries require not only reliability, but an attractive design and high quality finishing. Also speed of the lift — especially during embarking and disembarking periods — is a major factor for the experience of passengers. We know that installed elevators need to provide an efficient people flow.

On the other hand Cargo vessels depend on reliability even more. Durable and widely tested components that we supply guarantee shorter downtime and low maintenance costs.

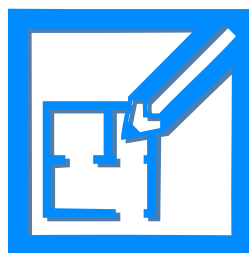

OFFSHORE SOLUTIONS

We understand unique conditions and challenges that comes with offshore installations.

That is why starting with design phase we try to find the right solutions for each installation.

We do not just install transport equipment on such installations. We strive to find equipment that is capable to last for the entire lifecycle of an unit.

We're designing every lift to the special requirements of the customer and providing full range of services, including:

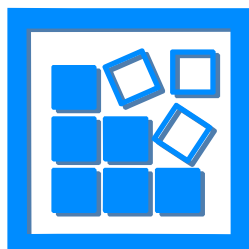

Design

During Designing phase instead of forcing standard (typical) solutions we are matching customers' needs and requirements.

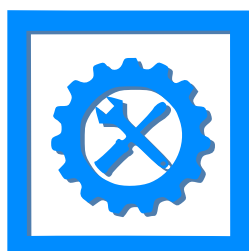

Delivery

Techwind MarineLifts cooperates with leaders in lift equipment production to Deliver reliable and durable final product.

Assembly

Our experienced Assembly specialists crew guarantees many years of operation for Your lifts. Commissioning with classification society is easy when lifts are properly installed.

Service and maintenance

Standard or extended guarantee for installed devices. Our lift maintenance crew understands that efficiency is crucial in naval conditions. That is why they are ready to react 24/7.

PRODUCTS

PASSENGER AND CARGO SOLUTIONS

Whole our team works with you to create solutions that'll keep your business afloat.

DUMBWAITERS

ESCALATORS / TRAVELATORS

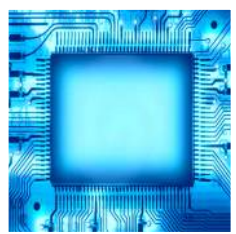

The new generation of escalators/travelators has inherited safety, reliability, high efficiency and attractive outline. They are widely applicable for large passenger flow areas.

ESCALATORS

TRAVELATORS

CONTROL SYSTEMS

One of the most important parts of the elevator is its control system. As it often is, something you do not see has the largest influence on the experience of using the lift. Control system provided by Techwind are based on the best components supplied only by renowned producers. Our control system allow our lifts to do almost everything you would like Your lift to do. By that we mean special functions programmed for your individual needs.

CAR CABIN DESIGN

The every day experience of using elevators influence your satisfaction from the product. The looks of the car is the major factor of that experience. However car cabins designs for marine conditions should also be prepared for those conditions. Techwind understands that fully and provides wide range of stainless steel car cabins. Pleasing to the eyes, easy to clean and extremely durable.
